

Meine Daten sollen nicht mehr aus einem Array kommen sondern sollen aus einer externen JSON-Datei kommen und im Browser angezeigt werden. Hierfür requestData. Interface wird immer noch gebraucht

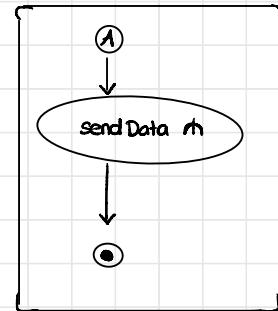

sendData

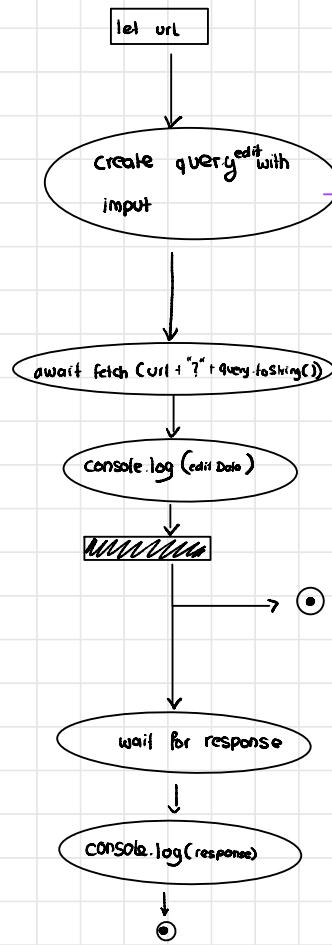

(Daten aus der JSON-Datei werden geliefert)?

hier Speichern wir die Dinge aus dem Inputfeldern

edit Data

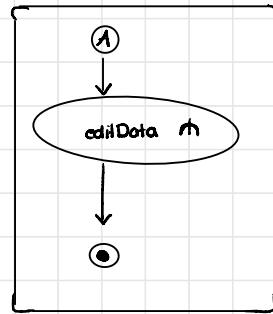

Welche Input - Elemente braucht ich

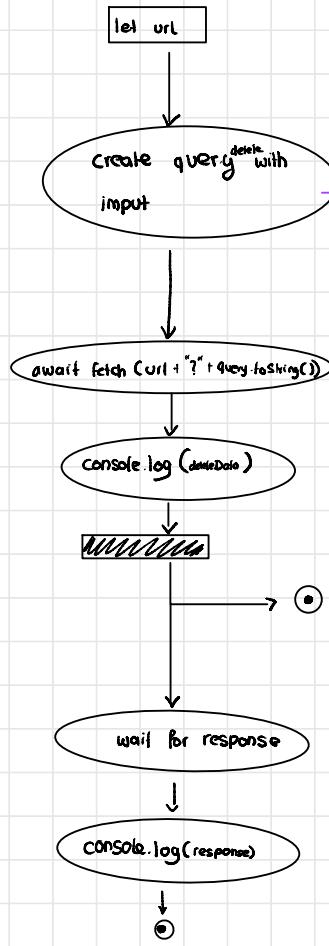

↳ task, comment, person, date

newDiv.id = "#"+i;

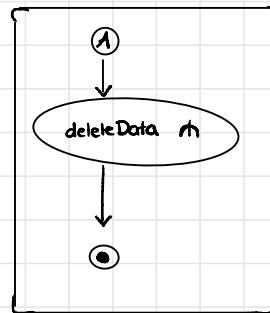

↳ funktioniert nicht
da newDiv.id = "" + i global initialisiert wird.

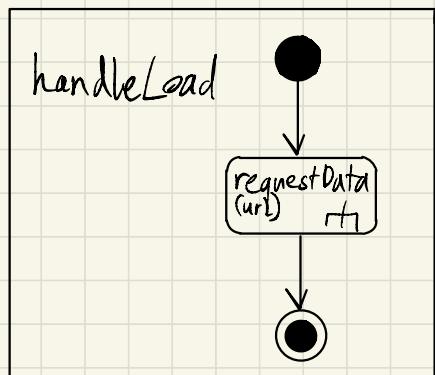

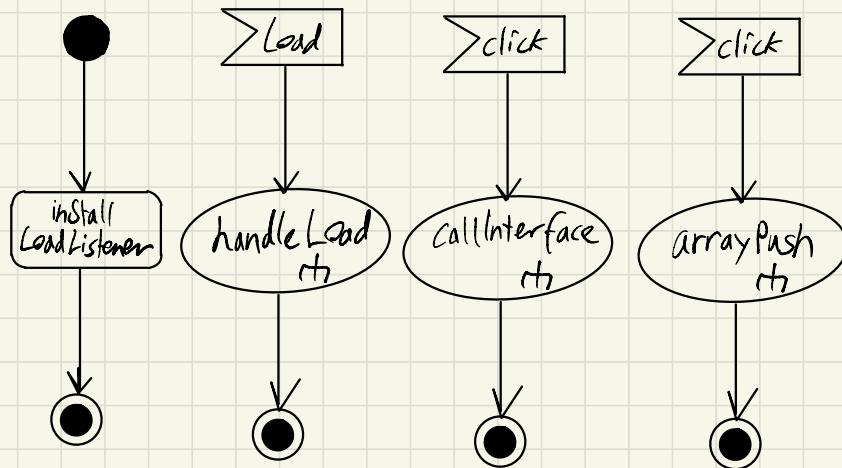

deleteData

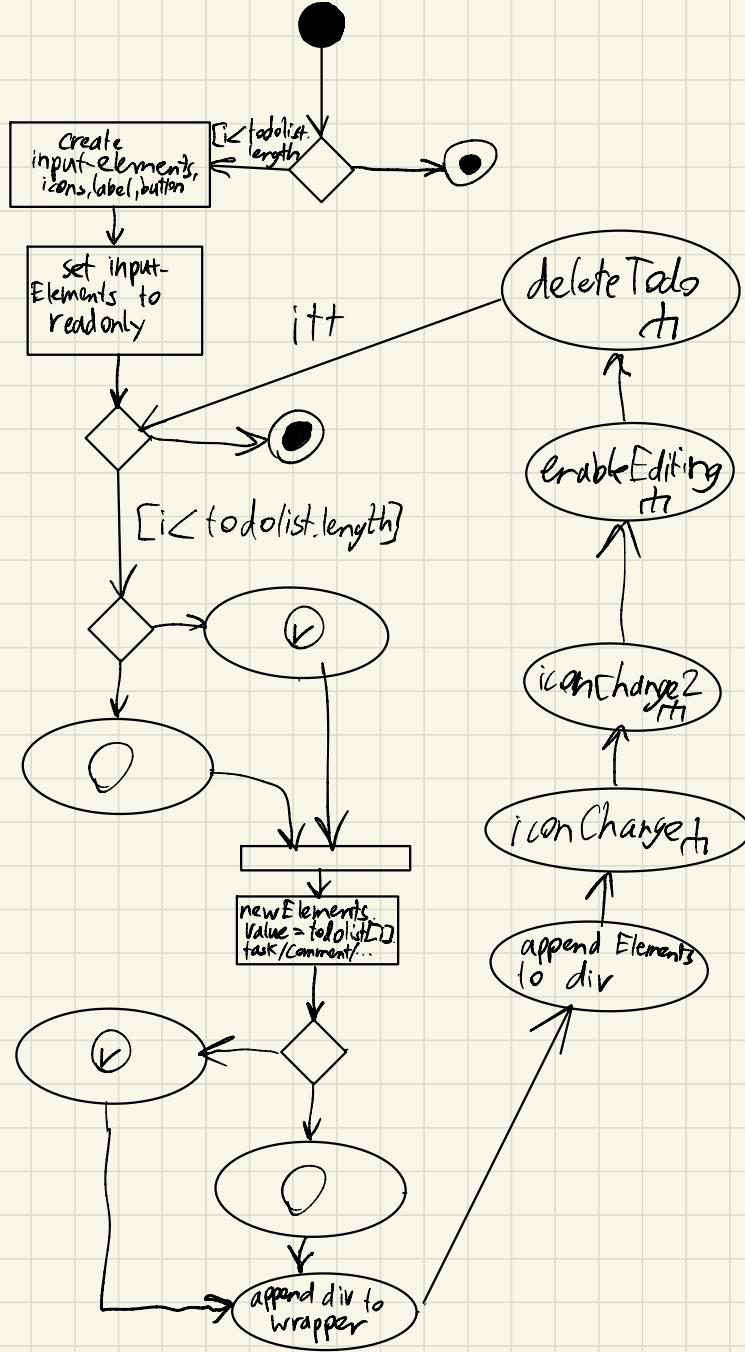

Welche Input - Elemente brauch ich
↳ task, comment, person, date
`newDiv id = "# + i"`

In Zusammenarbeit mit Lenni Fleig

requestData

```
response = await fetch(url)
```

console.log(response)

await response

```
Offer = await response.text()
```

console.log(offer)

await offer
